

Standard Risk Tolerance Questionnaire

Envestnet's Standard Risk Tolerance Questionnaire (RTQ) is scored using a "Weighted" method. The first six questions of the RTQ are assigned numerical weights to reflect each one's comparative importance in overall risk determination. Answer choices for each question are then assigned point values for use in the "Weighted" method of scoring.

The total point score of all relevant questions is then used on the Point Scale (listed below) to determine the client Investment Objective.

Please refer to the [Envestnet RTQ Methodology](#) for further background on our approach to determining risk tolerance.

Envestnet 7-Point Scale

Investment Objective	Risk Tolerance	Risk Low	Risk High
Capital Preservation	Low	1	14
Conservative	Low	15	29
Conservative Growth	Moderate	30	43
Moderate	Moderate	44	57
Moderate Growth	Moderate	58	71
Growth	High	72	86
Aggressive	High	87	100

Risk Tolerance Questionnaire

1. The graph below shows the potential range of gains or losses of a \$100,000 investment in each of seven hypothetical portfolios at the end of a 1-year period. The number to the right of each bar shows the best potential gain for that portfolio, while the number to the left of each bar shows the worst potential loss. Given that this is the only information that you have on these seven hypothetical portfolios, which one would you choose to invest in?

2. Inflation (rising prices for goods and services) can have a significant effect on your investments by decreasing their potential purchasing power over time. Aggressive investments have historically outpaced inflation over the long run, but have had more instances of short-term losses than more conservative investments. How do you feel about inflation and its potential impact on your investments?

- ☐ You are satisfied with your investments keeping pace with inflation. Limiting the potential for short-term loss is your main goal, and you are willing to sacrifice the potential for higher returns.
- ☐ You would like your investments to outpace inflation. You are willing to assume some potential for short-term loss in order to pursue that goal.
- ☐ You prefer that your investments significantly outperform inflation. You are willing to assume a greater potential for short-term loss in order to pursue that goal.

3. Suppose that a substantial portion of your investment portfolio is invested in securities. If the stock market were to experience a prolonged down market, losing 50% of its value over a 3-year period, what would you do (assuming your securities behaved in a similar fashion)?

- ☐ Sell all the securities in your portfolio. You are afraid that the stock market is in a downturn and you cannot afford the decrease in value.
- ☐ Sell half of the securities in your portfolio. You think that the market may rebound, but you are not willing to leave all of your investment exposed to further loss.
- ☐ Hold the securities in your portfolio. You understand that your investment may be subject to short-term price swings and are comfortable 'weathering the storm'.
- ☐ Buy more securities for your portfolio to take advantage of their low price. You are comfortable with market fluctuations and assume that the securities will potentially regain their previous value or increase in value.

Risk Tolerance Questionnaire

4. Once again, assume you have a substantial portion of your investment portfolio in securities. If the stock market were to gradually decline at an average of 2% per month, eventually losing 24% of its value over a year, which of the following would you do?

- ☐ Sell the securities in your portfolio and realize the 24% loss. You wish to avoid the risk of further loss.
- ☐ Sell half of the securities in your portfolio. You are not willing to leave all of your investment at risk for further loss.
- ☐ Do nothing. You are comfortable waiting for the securities to regain their previous value or to increase in value.
- ☐ Invest more now because securities are selling for approximately 24% less than they were 12 months ago. You believe that the securities will potentially regain their value or possibly appreciate even higher over the long-term.

5. Aggressive investments have historically provided higher returns while exhibiting greater short-term price fluctuations and potential for loss. How do you feel about fluctuations in the value of your portfolio?

- ☐ You want to minimize the possibility of loss in the value of the portfolio. You understand that you are sacrificing higher long-term returns by holding investments that reduce the potential for short-term loss and price fluctuation.
- ☐ You can tolerate the risk of moderate losses in order to pursue potentially favorable returns.
- ☐ You can tolerate the risk of large losses in your portfolio in pursuit of greater potential gains.

6. What is the investment time horizon on these investable assets?

- ☐ Less than 3 years
- ☐ 3 – 5 years
- ☐ 6 – 9 years
- ☐ 10+ years

7. What is your current annual household income?

- | | |
|--|--|
| ☐ None | ☐ \$250,001 – 500,000 |
| ☐ \$0 – 30,000 | ☐ \$500,001 – 1,000,000 |
| ☐ \$30,001 – 50,000 | ☐ \$1,000,001 – 3,000,000 |
| ☐ \$50,001 – 100,000 | ☐ More than \$3,000,001 |
| ☐ \$100,001 – 250,000 | |

8. What is your approximate net worth?

- | | |
|---|--|
| ☐ Less than \$250K | ☐ \$3M – 5M |
| ☐ \$250 – 500K | ☐ \$5M – 10M |
| ☐ \$500K – 1M | ☐ \$10M – 20M |
| ☐ \$1M – 3M | ☐ More than \$20M |

Risk Tolerance Questionnaire

9. What are your income needs from program assets?

- | | |
|--|---|
| ☐ None | ☐ \$60,000 Per Year |
| ☐ \$10,000 Per Year | ☐ \$70,000 Per Year |
| ☐ \$20,000 Per Year | ☐ \$80,000 Per Year |
| ☐ \$30,000 Per Year | ☐ \$90,000 Per Year |
| ☐ \$40,000 Per Year | ☐ \$100,000 Per Year |
| ☐ \$50,000 Per Year | ☐ More than \$100,000 Per Year |

10. What is your State Tax Bracket?

- | | |
|-----------------------------|-----------------------------------|
| ☐ 0% | ☐ 6% |
| ☐ 1% | ☐ 7% |
| ☐ 2% | ☐ 8% |
| ☐ 3% | ☐ 9% |
| ☐ 4% | ☐ 10% |
| ☐ 5% | ☐ Over 10% |

11. What is your Federal Tax Bracket?

- | | |
|------------------------------|------------------------------|
| ☐ 0% | ☐ 24% |
| ☐ 10% | ☐ 32% |
| ☐ 12% | ☐ 35% |
| ☐ 22% | ☐ 37% |
